JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

## BRAZIL.

*Report from Manaus—Decrease of yellow fever—Sanitary measures.*

The following is received from Dr. H. Wolfersham Thomas, representative of the Liverpool Tropical School of Medicine, under date of May 24:

The present state of health is excellent. There are no yellow fever cases in the hospitals. Yellow fever was epidemic from September, 1906, to February, 1907, but since that date very few cases have occurred. Few endemic cases have developed.

The sanitary authorities are taking measures to combat yellow fever and are becoming more stringent in prophylactic measures.

## BRITISH HONDURAS.
